

Backyard Vegetarian Layer Mash

PRODUCT CODE
OPO01-XXVM

DESCRIPTION

The CHF Organic Backyard Vegetarian Layer Mash is a fully balanced ration designed to meet the specific needs of backyard laying birds, without the inclusion of animal ingredients such as meat meal or fishmeal. This feed is perfect for those owners who themselves are vegetarian, or who simply prefer not to feed their birds any animal by-products.

APPLICATION

CHF Organic Backyard Vegetarian Layer Mash is strategically formulated to suit small flocks of birds and makes allowance for additional sources of dietary intake such as vegetable scraps and pickings from around the garden. The CHF Organic Backyard Vegetarian Layer Mash provides all the essential vitamins and minerals to ensure consistency in laying and to provide well formed, strong-shelled eggs with vibrant yolks.

FEED DIRECTIONS

CHF Organic Backyard Vegetarian Layer Mash is formulated for laying birds. (Approx. 18 – 20 weeks). It is advisable to blend the layer feed with CHF Organic Chicken Starter Grower from 16 weeks to assist with the transition onto the layer feed.

Typical feed consumption for birds fed on CHF Organic Backyard Vegetarian Layer Mash is between 130g – 150g per head per day. Feed is best provided ad lib as the birds naturally regulate their consumption according to their energy requirements. A specially designed self-feeder is the most suitable method of doing this. To obtain minimal wastage, ensure that the feeder is elevated so the birds can comfortably access the feed, but high enough so they cannot scratch it out onto the ground with their feet. Always ensure that birds have access to clean potable drinking water.

ANALYSIS

Min. Crude Protein	15.0%
Max. Crude Fibre	7.0%
Max. Salt (NaCl)	0.2%
Copper	9 mg/kg
Selenium	0.23 mg.kg
Min. Calcium (Ca)	3.0%
Max. Calcium (Ca)	4.5%
Min. Phosphorus (P)	0.4%
Max. Phosphorus (P)	1.0%
