

# Backyard Soy Free Layer Pellet

## DESCRIPTION

With the same specifications as the CHF Organic Backyard Soy Free Layer Mash, the CHF Organic Backyard Soy Free Layer Pellet offers a complete layer ration for backyard chickens without the use of any soy or soy meal. All CHF Pellet rations are made from the same quality raw materials as found in the mash and wholegrain feeds. They have been finely milled and pressed into a durable pellet, providing birds with a complete and balanced diet.

## APPLICATION

Utilising other organic protein meals such as sunflower meal, safflower meal, meat meal, fishmeal and linseed meal, the CHF Organic Backyard Soy Free Layer Pellet offers a 15% protein ration. It provides birds with all the essential vitamins and minerals necessary to ensure consistency in laying and to provide well formed, strong-shelled eggs with vibrant yolks.

## FEED DIRECTIONS

CHF Organic Backyard Soy Free Layer Pellet is formulated for laying birds. (Approx. 18 – 20 weeks). It is advisable to blend layer feed with CHF Chicken Starter Grower from 16 weeks to assist with transition onto the layer feed.

Typical feed consumption for backyard laying hens is between 130g – 150g per head per day. Feed is best provided ad lib as the birds naturally regulate their consumption according to their energy requirements. A specially designed self-feeder is the most suitable method of doing this. To obtain minimal wastage, ensure your feeder is elevated so the birds can comfortably access the feed, but high enough so they cannot scratch it out onto the ground with their feet. Always ensure that birds have access to clean potable drinking water.

**PRODUCT CODE**  
OPO01-XXSP

## ANALYSIS

Min. Crude Protein	15.0%
Max. Crude Fibre	7.0%
Max. Salt (NaCl)	0.3%
Copper	9 mg/kg
Selenium	0.23 mg.kg
Min. Calcium (Ca)	3.0%
Max. Calcium (Ca)	4.5%
Min. Phosphorus (P)	0.4%
Max. Phosphorus (P)	1.0%

## KEY POINTS

- PRODUCT OF AUSTRALIA
- CERTIFIED ORGANIC
- NUTRITIONALLY BALANCED DIET
- NO SOY PRODUCTS USED
- 20KG PACKAGING
- FEED FROM POINT OF LAYER (18-20 WEEKS)
- AVAILABLE AUSTRALIA WIDE
