

Free Range Layer Mash

PRODUCT CODE
OPO15-M

DESCRIPTION

The CHF Organic Free Range Layer Mash is Country Heritage Feeds' premier laying ration. Formulated using the very best organic grains, this ration is used by some of Australia's leading organic egg producers whose eggs can be purchased in retail outlets all over the nation.

APPLICATION

Because of its high specification, the CHF Organic Free Range Layer Mash is ideal for large flocks of birds, or birds that are kept in small backyards with little or no forage areas. Providing a completely balanced diet, this high protein and high energy ration will satisfy your poultry's daily nutritional requirements without the need for additional inputs such as vegetables and food scraps.

FEED DIRECTIONS

CHF Organic Free Range Layer Mash is best fed once the birds have reached point of lay, (Approx. 18 to 20 weeks) although blending with the Organic Chick Starter Grower Mash from 16 weeks is advisable to assist with the transition to layer feed.

Typical feed consumption is between 110g – 130g per head per day and feed is best made accessible through a specially designed self-feeder. To obtain minimal wastage, ensure your feeder is elevated so the birds can comfortably access the feed, but high enough so they cannot scratch it out onto the ground with their feet. Always ensure that birds have access to plenty of clean potable drinking water.

ANALYSIS

Min. Crude Protein	18.0%
Max. Crude Fibre	7.0%
Max. Salt (NaCl)	0.6%
Copper	9 mg/kg
Selenium	0.23 mg.kg
Min. Calcium (Ca)	3.0%
Max. Calcium (Ca)	4.5%
Min. Phosphorus (P)	0.4%
Max. Phosphorus (P)	1.0%
