

Free Range Layer Pellet

DESCRIPTION

The Free Range Layer Pellets is Country Heritage Feeds premier laying ration. Formulated using the very best organic grain's, this ration is used by some of Australia's leading organic egg producers who's eggs can be found on supermarket shelves all over the nation.

APPLICATION

Because of its high specification, the Free Range Layer Pellets is ideal for large flocks of birds, or birds who find themselves in small backyards with little or no forage areas. Providing a completely balanced diet, this high protein, high energy diet will satisfy you poultry's daily nutritional requirements without the need for additional inputs such as vegetable and food scraps.

FEED DIRECTIONS

For young chicks, the Free Range Layer Pellets is best being fed once they have reached the point of layer (18 to 20 weeks) although blending with the Chicken Starter Grower from 16 weeks is advisable to assist with shell formulation.

Typical feed consumption is between 110g – 130g per head per day and is best made accessible through a feeder. To ensure minimal wastage, ensure your feeder is elevated so the bird can comfortably access the feed but high enough so they can't scratch out with their feet onto the ground. Always ensure they birds have access to plenty of clean drinking water.

PRODUCT CODE

OPO15-P

KEY POINTS

- PRODUCT OF AUSTRALIA
